Knowledge Web Developer. Recently I am working with for Backend Laravel and for Frontend Vue js. I choose Laravel and Vue js cause this both have a good combination. Vue js provide SPA or single page application system that's I like more. Project that I have done in the past all source code are available in GitHub, and some of my design project screen shots are available in Dribbble and Behance. I also have good knowledge about Laravel API or RestFul API's.
